OBJECTIVE

Aspiring AI Programmer with a solid foundation in Artificial Intelligence, Data Science, and Robotics. Currently expanding expertise into game development, targeting roles as an AI Programmer in the games industry. Passionate about bridging data-driven logic with interactive entertainment through intelligent game systems.

EDUCATION

Bachelor of Technology — Artificial Intelligence & Data Science Sep 2023 – Expected 2027
Rajagiri School of Engineering and Technology (RSET), Kerala — Minor in Robotics

Higher Secondary Education (HSE) Passed: 2023
St. Thomas Higher Secondary School — Percentage: 91%

Secondary Education (SSLC) Passed: 2021
M.P.M Higher Secondary School — Percentage: 97%

PROJECTS

Morpheus-AI — Deepfake Detection System (Group Project)

- Built a deepfake video forensic pipeline processing 1,000+ test frames, leveraging MTCNN for face extraction and TensorFlow (Xception CNN models) to achieve 94% classification accuracy.
- Evaluated models across 2 benchmark datasets, reducing false positive rates by 12% in identifying manipulated facial media artifacts.

E-Commerce Price Intelligence Tracker

- Developed an automated web scraping pipeline using Python, Selenium, and Pandas to systematically extract and structure e-commerce pricing metrics into datasets.
- Engineered a custom SMTP email alerting system to monitor market data and trigger automated notifications when product prices fall below predefined thresholds.
- Integrated a Streamlit dashboard interface to track historical pricing trends and visualize market changes.

Personal Portfolio Website

- Designed and deployed an interactive personal portfolio hosted at jezwin-eng.github.io.
- Showcases full-stack capability — combining back-end logic with polished front-end UI/UX implementation.

Project Argus — Adaptive Agent Orchestration Framework (Ongoing)

- Architecting a multi-agent orchestration framework designed to simulate 500+ concurrent LLM-driven autonomous agents using adaptive, relevance-guided cognitive updates (Behavioral Level of Detail).
- Targeting a 30% reduction in expensive LLM token invocations while preserving 95%+ behavioral fidelity across simulation stress tests.

Panel-Sim — Interactive Simulation Engine (Ongoing)

- Developing a custom simulation environment managing multi-agent interactions across 3 dynamic scenario test beds simultaneously.
- Engineering core simulation and state-management pipelines maintaining a stable 60 update cycles per second for smooth agent behavior.

Sora Jarvis — Personal AI Assistant Infrastructure (Ongoing)

- Building a local voice and text AI assistant framework integrating LLM reasoning with system-level command execution, achieving sub-second response times.
- Integrating Python and Ollama to manage workflows across 3 distinct local model variations with 99.5% local execution success rate.

INTERNSHIPS

Data Science Intern Techmaghi

- Applied data science techniques to real-world datasets containing over 10,000 records; built and evaluated 3 predictive models using Python.
- Improved baseline model predictive accuracy by 15% through iterative feature engineering workflows.

Cloud Computing Intern NeST Digital Academy

- Focused on cloud infrastructure concepts, scalable architecture, and deployment strategies using Microsoft Azure.
- Developed understanding of how cloud-native systems support large-scale data and AI workloads.

TECHNICAL SKILLS

Languages: Python, C, HTML/CSS

AI / ML & LLMs: TensorFlow, PyTorch, Scikit-Learn, OpenCV, Ollama, MTCNN, Deepfake Detection, Data Modeling

Game Dev: Unity (learning), Godot (beginner), GDScript, 2D Pixel Art

Tools & OS: Git, Arch Linux, Hyprland WM, Figma, AutoCAD (basic)

Web Dev & Cloud: Streamlit, Selenium, Pandas, Azure Cloud Fundamentals

CERTIFICATIONS

- Python — Kaggle Certified
- Cloud Computing — Certification
- Software Testing — Certification
- UI/UX Design — Course Completion

SOFT SKILLS

Time Management • Adaptability • Teamwork • Continuous Learning

LANGUAGES

English (S, R, W) • Malayalam (S, R, W) • Hindi (S, R, W)

PERSONAL INTERESTS

Anime & Manhwa • Game Mechanics & Design • Reading • Epicurean (Food Culture) • Digital Culture

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
